## Three Ancient Black Magic Spells

### Curse Removal Magick

Pine needles

Powder all of the above very well. Burn the powder on lit charcoal. Waft the smoke in as needed. When the entire powder is spent, gather the ashes in a covered pot. Who cast the Evil Eye?

Children were believed to be very vulnerable to the Evil eye. There are many spells to protect children from the evil eye. This is an ancient Greek spell that uses cloves to conduct a diagnosis of the source and cure of the evil eye that could be cast on an innocent being.

Gather the following items for the spell:

1 white candle

A small needle

1 large clove (or more depending on questions asked)

Make a list of people who could've given the child the evil eye.

Also make a list of the people who can help you get rid of the evil eye.

Light a candle. Stick the needle through a clove and hold it over the flame.

After some visualization as to the circumstances that happened to cause this problem, ask questions about the person. Is this a man?

Is this the person? Is this the right one to cure it?

If the clove pops during the question or immediately after it, this is a YES answer. Continue to ask questions until you are satisfied as to the source of the Evil eye as well as the best cure for it.
